Health, Safety & the Environment Policy

BRIT's Policy on Health, Safety and the Environment is:

“To ensure Health and Safety to all our employees including contract workers and to protect the Environment against industrial pollution”

The Principles on which we operate our facilities and conduct our business are:

1. We comply with all applicable occupational Health, Safety & the Environmental laws, rules, codes and regulatory requirements.
2. We provide adequate engineered features in design for radiation, environmental and occupational health safety aspects.
3. Promote the use of sound environmental management practices and adherence to safety requirements & radiation protection procedures among all employees, contractors and suppliers.
4. We prevent injuries, accidents and pollution through adequate defence in depth approach in design, construction, commissioning and operation of various facilities.
5. We have effective process of hazard identification, analysis, risk assessment and implement the best preventive and control measures.
6. We reduce generation of wastes and dispose inevitable wastes in environmentally acceptable manner within the applicable limit set by the regulatory authority and ETP set up is the first milestone in this regard.
7. We conserve key resources/raw material viz. water, oil and energy by optimum use.
8. We recognize that every employee can contribute for Health and Safety practices.
9. We, at all levels, attach the greatest importance to health, safety and protection of the environment as well as impart necessary training.
10. We shall strive to continuously improve occupational Health, Safety and the Environment performance.
