Facility-in-Charge

To Whomsoever it may Concern

ISOMED facility under the aegis of the Board of Radiation and Isotope Technology, Department Of Atomic Energy, Govt. of India has been providing the impeccable radiation processing services for terminal sterilization of the healthcare products for over 44 years now.

Considering the marathon years of indomitable radiation processing operations, it has been decided, to resort to a prolonged shutdown to address aging related degradation particularly with respect to safety critical system of the facility.

Accordingly round the clock operation of the facility will be kept in abeyance with effect from 01/10/2018 for at least 24 months. It may please be noted that resumption of the operation of the facility would depend upon the restoration of the healthiness of the degraded safety systems, subject to regulatory approval.

In view of the above mentioned plans, all our valued stakeholders are advised to make suitable arrangements at their end with respect to terminal sterilization of their products.

Our valued clients are also requested to note that we would not be able to accept any consignment for processing after **25/08/2018**, therefore they are advised to plan their shipments through online booking system of ISOMED such that the shipment should reach ISOMED facility on or before **25/08/2018**.

Assuring you our timely, quality radiation processing services always.
